The Family Is Under Attack

READ THE TOP 10 WAYS THE FAMILY IS BEING ATTACKED BY A PROGRESSIVE AGENDA.

There is no denying that the family is under attack by a progressive, Leftist agenda. The radical Left is trying to undermine the role of parents and faith in our society by indoctrinating our children in anti-biblical values. But as parents and grandparents we must remember that God has given us both the authority and responsibility to teach our children and disciple them in the truth of God's Word. Here are the top 10 attacks we see being launched against the family and FRC's solutions to protect the family and uphold biblical truth.

1. Late-Term Abortion and Infanticide

The reason there is such an intense debate about late-term abortion and infanticide at the state and federal level is that America is the closest it has ever been to overturning *Roe v. Wade*. FRC has been on the front lines advocating for the sanctity of life on Capitol Hill, in the media, and our culture. Despite the Left's extreme abortion measures, we have a tremendous opportunity to protect life in the womb with the support of a pro-life Trump administration such as the fight over infanticide and the new administration regulations separating abortion providers like Planned Parenthood from the federal Title X family planning program!

2. Sex Education and Parental Rights

Colorado recently proposed House Bill 1032 that gives less control to parents over sex education and more power to LGBT activists to normalize sex outside of marriage,

homosexuality, and gender confusion. FRC continually advocates at the federal and state levels to push for parental rights and sexual risk avoidance (SRA) education, and we helped direct more federal/state funding in that direction. However, this CO bill would eliminate federal funds they receive for effective SRA education. We encourage and equip parents to use their authority and advocate in their community against ineffective and harmful curriculum that opposes biblical truth.

3. LGBT Agenda and Big Business

It's no secret that many of America's largest companies have not only compromised on family values, but have thrown their weight, and wealth, behind leftist causes. From Target allowing men to use women's restrooms and dressing rooms, to Amazon following the anti-Christian Southern Poverty Law Center's (SPLC) marching orders to reject some mainstream Christian organizations from receiving donations through their "Smile" program, families are sometimes left with few options than to do business with those who undermine their freedoms. FRC works to expose these dangerous policies and mobilize concerned citizens to make their voices heard.

4. Porn and the Internet

Pornography is one of the fastest growing industries in the world with porn comprising 30 percent of all data now being transferred across the internet. The accessibility of porn is trapping men, women, and youth into addiction. FRC supports

ministries and churches that educate about the societal and spiritual harms of pornography and empowers people to break free from pornography addiction. We also work for appropriate restrictions that protect children from the harms of internet pornography and obscenity.

5. Divorce and Family Breakdown

Studies show that children do best when raised with a mother and father who are committed to each other in a lifelong marriage. The data also demonstrates that adults also thrive in this same family structure. Unfortunately, marriage has been weakened by decades of divorce and out-of-wedlock cohabitation. FRC advocates for pro-marriage policies that strengthen the family and build stronger communities, which ultimately build a stronger nation. Working with our allies in Congress FRC helped to eliminate the marriage penalties in most of the income tax breaks last Congress.

6. Silence on Moral Issues from the Pulpit

The pulpit needs to be the place that brings clarity to moral issues and then challenges the congregation to moral purity. But too many pastors remain silent about the anti-biblical agenda in our culture. FRC gathers pastors each year for our Watchmen on the Wall event and numerous regional briefings to encourage and pray with pastors to help them speak with biblical clarity to the moral issues of our day.

7. Hostility to Religious Freedom on School Campuses

There is growing hostility on school campuses to silence students who openly live out their faith. From a middle school group of friends who were told they were not allowed to pray during lunch to a college student who was publicly ostracized and threatened after declining to vote for a pro-LGBT policy, the threat to religious liberty is evident. FRC stands with students to openly express their faith and directly engages policymakers for the protection of every student's First Amendment rights.

8. Media Censorship

It is estimated that 69 percent of American adults use social media every day—it has now become the primary way to express our views. And while most internet companies claim to be open platforms for all political discussion, some groups and individuals—especially Christians and conservatives—are finding there are limits to free speech. This media censorship is an ongoing debate and one of the most critical free speech issues of our time.

9. Liberal Values promoted in Hollywood

When actor Dean Cain came to FRC's Values Voter Summit last year, he was harassed and called out for being intolerant by Hollywood elites. Cain's film *Gosnell* depicted the truth about abortion that Hollywood refuses to admit. It's why we at FRC continue to promote movies like *Gosnell* and the upcoming film *Unplanned*. Movies that spread the truth about abortion are important in an industry that opposes that truth.

10. Attacks Against Religious Freedom in the Military and Wedding Vendors

The radical Left wants people of faith to leave their biblical values at home or within the walls of their church. If you bake wedding cakes as a profession or even hold to the biblical definition of marriage in the military, the Left wants you jobless and silenced. FRC provides research on the importance of protecting religious liberty and our radio and communication efforts expose the Left's attacks as we work to protect and defend our religious freedom. FRC helped encourage the Department of Health and Human Services to protect faith-based adoption provider Miracle Hill after its funds were threatened under Obama era-regulations on same sex marriage.
